Biscayne Beach, which is currently under construction at 711 NE 29th Street in the Edgewater district of Downtown Miami, has released two new renderings of their common areas.

The interior designer of the project, Thom Filicia said, "For the design of Biscayne Beach, I was inspired by the sand, the sea and most of all – the city. By mixing natural elements with raw and refined materials, we created common areas that are bold and sophisticated, yet inviting and approachable. You can feel comfortable in a sarong and sandals or dressed for a New Year's party."

Biscayne Beach is a 399-unit luxury condominium being developed in the heart of Miami's East Edgewater district by a joint venture between West Palm Beach's Eastview Development and New York-based global real estate investment firm GTIS Partners. Featuring designs by celebrity interior designer Thom Filicia, the 51-story tower will bring the beach to the city's urban core with a private members-only Beach Club overlooking Biscayne Bay. Located at 711 NE 29th Street, Biscayne Beach began construction in June of 2014, with completion slated for 2016. Prices average \$550/square foot.
